

Why choose **BIOMASS**

Up to
95%
efficiency

Heating with pellets produces very little air pollution or ash and the majority of the heat generated ends up in the room not up the chimney. Our biomass products are energy saving ready.

Full automation

- Automatic addition of fuel
- Remote or touchscreen control
- Fully programmable
- Very little user input required
- Specifically tailored to your needs

Low carbon fuel

kg CO₂ emissions/pallet

Electric 7.21

Gas 2.14

Biomass 0.15

15.7 tonnes CO₂ saved
in a year when replacing a fossil
fuel fired heating system with
biomass

= the amount of CO₂ produced
when travelling **47,000** miles by car

Smartphone compatible

The benefit of remote control
through your Wi-Fi

£990
saved in a year

if you replace an old
electric heating system
with a biomass system

£225

saved in a year

if you replace an older
gas heating system
with a biomass system

**Benefit from
the RHI**

Under the Renewable Heat
Incentive (RHI) scheme, you could
receive quarterly cash payments
if you install an eligible renewable
heating technology, via an MCS
registered installer
